Re: Notice of Construction
Job: Contract No. BIBT5737814,
Anchor Job# 25-11-023 - WSSC Hannon Street Water Main Rehabilitation.

Dear Residents,

On **06/01/2026 to 06/04/26 between 9:00pm-5:00am**, Anchor Construction plans to begin work at the above-referenced location (between Merwood Dr and Erskine St) to excavate and install new 20in Tee to the watermain for WSSC. This work will include temporary traffic control measures and lane closures along New Hampshire Ave. The contractor will also require designated parking spaces for construction equipment and stored materials.

To assist with your planning, we will continue to provide updates if any changes occur. There may be times when access to parking lot entrances is temporarily impacted due to equipment setup, but we will work promptly to restore access and minimize any inconvenience.

We assure you that we will do everything we can to minimize impact. If there are any questions or concerns, please let us know at the numbers below. To make this project successful, your cooperation in this is much appreciated.

Sincerely,
ANCHOR CONSTRUCTION CORPORATION
