MEMORANDUM

TO: Users of the Maryland Standard Method of Test (MSMT) Manual

FROM: Eric Dougherty, Chief,
Engineering Geology Division

DATE: March 2, 2012

SUBJECT: Revisions to the MSMT Manual

The following are revisions to the Maryland Standard Method of Test Manual:

- The format of the Sample Frequency Guide has been completely revised; however the required processes have not changed.
- The document is now organized by material types and lists out all relevant processes along with the frequencies with which the processes are performed.

Hard copies of this Manual are no longer being printed and updates will only be available at <http://www.roads.maryland.gov/Index.aspx?PageId=39>

If you have any questions or comments regarding these changes and updates, please contact Lester T. Davis at 443-572-5022.

Revisions: Sample Frequency Guide
