

## U.S. FISH AND WILDLIFE SERVICE

Some of the 67 men and women of the U.S. Fish and Wildlife Service who attended the commercial vehicle safety inspection and cargo securement of heavy equipment class provided by MCD at the Patuxent Research Refuge in Laurel Maryland on June 17th.

The class was requested by the U.S. Fish and Wildlife Service to better inform their employees responsible for the transportation of heavy forestry equipment and operators of their agency owned commercial vehicles.

Much positive feedback was received and the level of participation and depth of CMV regulatory questions were outstanding and made for a great class!
