MODIFIED MARTCP REQUIREMENTS DUE TO COVID-19 PANDEMIC

Due to the current COVID-19 crisis, MDOT SHA is making the following temporary revisions to the Mid-Atlantic Region Technician Certification Program (MARTCP) to ensure that we can continue to deliver essential mission critical transportation projects:

- Currently, all MARTCP training classes and exams are postponed until further notice.
- For those technicians who have MARTCP cards that are expiring in 2020 and haven't received their Final Audit within 2020, the MARTCP cards will remain valid until December 31, 2020.
- Independent Assurance (IA) audits for MARTCP re-certification will continue as much as possible.
- For those technicians who are not currently certified in MARTCP Program Disciplines, they will be allowed to work on MDOT SHA projects until new guidance is provided, under the following condition:
 - Those technicians must work under the direct supervision of a MARTCP certified technician after completing the pertinent self-study or online courses. This will ensure new technicians have at least the basic technical knowledge before starting work on a project.

Note: These revised MARTCP guidelines are temporary and will be in place until new guidance is provided.
